Trends and Opportunities Shaping the Global Wine Industry

- The core objective of this report is to examine the current state of the global wine market looking at both product and packaging.
- In addition to providing a global overview of market performance looking at the current state of wine and its packaging in 2010, the report also analyses performance by product category and looks at geographic regions to identify some opportunity markets for wine in the future.
- The final part of the report looks at the key trends and drivers for wine. It looks at how these trends are impacting the wine category by using data and examples from both the alcoholic drinks and packaging systems.

(Euromonitor, April 2011)
